JULY 23, 2005

Help Us Plan an Environmental Justice Workshop

The Twenty-third Legislature of the State of Hawai'i, Regular Session of 2005, has requested the Environmental Council, with the assistance of the Office of Environmental Quality Control and the University of Hawai'i Environmental Center, to develop and promulgate a guidance document on including principles of environmental justice in all phases of environmental review undertaken pursuant to chapter 343, Hawai'i Revised Statutes; provided that in developing the guidance document, input should be sought from a wide segment of interested parties, includ-

ing high school students who are concerned about this issue. The Environmental Council is requested to submit the guidance document to the Legislature no later than twenty days prior to the convening of the Regular Session of 2006.

The Environmental Council is meeting from noon to 3 p.m. on Wednesday August 10, 2005 to plan a public workshop in October on developing draft environmental Justice guidelines. The meeting will be held in the OEQC office. If you wish to attend please contact OEQC at 586-4185 no later than August 5, 2005.

Poipu Village

The Eric A. Knudsen Trust proposes to develop a residential community called the Village at Po'ipu, to be located in Po'ipu, Kaua'i. The project will include a mix of single-family and multi-family residential units, archaeological preserves, parks, and bicycle/pedestrian paths.

Located in an area designated as "Residential Community" on the Kaua'i County General Plan, the project is expected to fill some of South Kaua'i's residential growth needs by providing a variety of housing options.

As planned, the project will contain 350-503 residential units, 12 acres of parks, and 22 acres for archaeological preserves. Bicycle and pedestrian paths will be built including a shared path in Hapa Road.

An EISP/N is being undertaken to address HRS Chapter 343 requirements and support State Land Use District Boundary Amendment. See page 13.

Pupukea Ridge Preservation

ACF, A Charitable Foundation, plans to donate 79 acres of land along Pupukea Ridge to the State for a preservation park. This will involve reclassification by the Land Use Commission of some of the area from agriculture to conservation, and some from conservation to agriculture, so that the donated area will be completely in conservation. See the draft EA notice on page 7.

Comment on the State Department of Education's Exemption List

The State Department of Education has submitted its latest exemption list for review and concurrence by the Environmental Council. Please contact OEQC to get a copy if you wish to comment on the new exemption list. The deadline to comment is August 22, 2005.

Your guide to the Environmental Review Process

Draft Environmental Assessment

A project or action that may affect the environment cannot be implemented until an Environmental Assessment (EA) is prepared in accordance with Chapter 343, Hawai'i Revised Statutes (HRS). If the lead State or county agency (the *proposing agency* for agency actions, or the *approving agency* for applicant actions) anticipates that the project will have no significant environmental impact, then affected agencies, individuals, and organizations must be consulted and a Draft EA (DEA) is written and public notice is published in this periodic bulletin (see, section 343-3, HRS) known as the *Environmental Notice*. The public has 30 days to comment on the Draft EA from the date of the first notice.

Final Environmental Assessment and Finding of No Significant Impact

After the lead agency reviews the public comments, if it determines that the project will have no significant effect on the environment, then it will prepare a Final EA (FEA) and issue a Finding of No Significant Impact (FONSI) formerly called a *Negative Declaration*. The Final EA must respond to all public comments. An Environmental Impact Statement will not be required and the project may now be implemented. The public has 30 days from the first notice of a FONSI in this periodic bulletin to ask a court to require the preparation of an EIS.

Final Environmental Assessment and Environmental Impact Statement Preparation Notice

When a lead agency decides that a project may have a significant environmental impact, an Environmental Impact Statement (EIS) must be prepared prior to implementing the project. Like the DEA (see *above*), affected agencies, individuals and organizations must be consulted prior to preparation of the final EA (FEA) and issuance of a determination called an EIS preparation notice (EISPN). (The EA is called *final*, to distinguish it from the draft, *above*). After the FEA is written by the lead agency, and notice of the FEA and EISPN is published in this periodic bulletin, any agency, group, or individual has 30 days from the first publication of the EISPN to request to become a consulted party and to make written comments regarding the environmental effects of the proposed action. The public (including an applicant) has 60 days from the first notice of an EISPN in this periodic bulletin to ask a court to not require the preparation of an EIS.

Draft Environmental Impact Statement

After receiving the comments on the FEA and EISPN (see *above*), the lead agency or private applicant must prepare a Draft Environ-

mental Impact Statement (DEIS) prior to project implementation. This document must completely disclose the likely impacts of a project. Direct, indirect and cumulative impacts must be discussed along with measures proposed to mitigate them. The public has 45 days from the first publication date in this periodic bulletin to comment on a DEIS. The DEIS must respond to comments received during the FEA-EISPN comment period in a *point-by-point* manner.

Final Environmental Impact Statement

After considering all public comments filed during the DEIS stage, the agency or applicant must prepare a Final EIS (FEIS). The FEIS must respond in a *point-by-point* manner to all comments from the draft stage. Requisite deeper analyses must be included in the FEIS. For applicant projects, the approving agency is authorized to accept the FEIS. For agency project the Governor or the county mayor is the accepting authority. Only after the EIS is accepted may the project be implemented.

Acceptability

If the FEIS is accepted, the law requires that notice of this be published in this periodic bulletin. The public has 60 days from the date of first notice of acceptance to ask a court to vacate the acceptance of an EIS. In the case of applicant actions, the law requires that an approving agency must make a determination on acceptance within thirty-days of receipt of the FEIS or the FEIS is deemed accepted. Also, for applicant actions, the law provides for an administrative appeal of a non-acceptance to the Environmental Council.

National Environmental Policy Act

The National Environmental Policy Act (NEPA) requires federal projects to prepare an EA or EIS. It many ways it is similar to Hawai'i's law. Some projects require both a state (or county) and federal EIS and the public comment procedure should be coordinated. Although not required by law, the OEQC publishes NEPA notices in this periodic bulletin to help keep the public informed of important federal actions.

Special Management Area

The Special Management Area (SMA) is along the coastlines of all our islands and development in this area is generally regulated by Chapter 205A, HRS and county ordinance. A special subset of the SMA that is regulated by Chapter 343, HRS is the Shoreline Setback Area. Most development in this area requires a Special Management Permit (SMP). This periodic bulletin posts notice of these SMP applications to encourage public input.

Shoreline Certifications

State law requires that Hawai'i shorelines be surveyed and certified when necessary to clearly establish the shoreline setback (an area contained between the certified shoreline and a prescribe distance inland (usually 40 feet) from the certified shoreline). The public may participate in the process to help assure accurate regulatory boundaries. Private land owners often petition to have their shoreline certified by the State surveyor prior to construction. This periodic bulletin publishes notice from the Department of Land and Natural Resources of both shoreline certification applicants and of final certifications or rejections.

Environmental Council

The Environmental Council is a fifteen-member citizen board appointed by the Governor to advise the State on environmental concerns. The council makes the rules that govern the Environmental Impact Statement process. The agendas of their regular meetings are published on the Internet at <http://www.ehawaii.gov/calendar> and the public is invited to attend.

Exemption Lists

Government agencies must keep a list describing the minor activities they regularly perform that are declared exempt from the environmental review process. These lists are reviewed and approved by the Environmental Council. This periodic bulletin will publish an agency's draft exemption list for public comment prior to Council decision making, as well as notice of the Council's decision on the list.

Conservation District

Any use of land in the State Conservation District requires a Conservation District Use Application (CDUA). These applications are reviewed and approved by the Board of Land and Natural Resources (BLNR). Members of the public may intervene in the permit process. Notice of these permit applications is published in this periodic bulletin.

Endangered Species

This periodic bulletin is required by Section 343-3(c), HRS, to publish notice of public comment periods or public hearings for habitat conservation plans (HCP), safe harbor agreements (SHA), or incidental take licenses (ITL) under the federal Endangered Species Act, as well as availability for public inspection of a proposed HCP or SHA, or a proposed ITL (as a part of an HCP or SHA).

Permits Required: Street Usage Permit, Grubbing, Grading, Excavation & Stockpiling Permit, Noise Permit and others

raised median. In conjunction with the widening, HDOT also proposes to rehabilitate the O'ahu Railway & Land (OR&L) railroad crossing and install a crossing gate.

HDOT proposes the widening because the existing road does not provide enough capacity to accommodate existing and anticipated future traffic demand. The project is consistent with existing government plans and policies to develop the necessary roadway infrastructure for Kapolei, O'ahu's second city.

Proposed improvements include bike lanes, sidewalks, curb and gutters, utilities, lighting, traffic signals, and intersection improvements. A closed drainage system is proposed for the northern part of the roadway to avoid contamination of a potable aquifer and retain roadway runoff within the ROW. Roadway design would also utilize a specialized, underground storm water detention and infiltration system, where feasible.

Project planning involved consultation with cultural experts, as a result of which HDOT believes the project, would not adversely affect Puu Kapolei. The project would also improve degraded conditions at the OR&L railroad crossing by replacing tracks and ties in the historic OR&L Right-of-Way (ROW). The work is anticipated to result in a "net benefit" to this historic property; nevertheless, the FHWA is likely to render an "adverse effect" determination under Section 106 of the National Historic Preservation Act (NHPA), because of the replacement of the railroad components.

The State of Hawai'i Department of Transportation (HDOT), in cooperation with the Federal Highway Administration (FHWA), proposes to widen Fort Barrette Road from a two-lane undivided roadway to a four-lane divided roadway with a

JULY 23, 2005

Kane'ohe Yacht Club South Drainage Easement Stabilization (HRS 343 DEA)

District: Kane'ohe

 Contact: Dave Nottage (244-8235)

Public Comment

Deadline: August 22, 2005
Status: Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the applicant with copies to the approving agency, consultant and OEQC.

Permits Required: Shoreline Variance, Building and Grading

The applicant proposes to construct bank stabilization improvements along the south storm drain easement of the Kane'ohe Bay Yacht Club. The project involves the north bank of the existing unlined drainage way that varies in width from 25-

30 feet. The storm drain easement is owned by the City and County of Honolulu.

The proposed bank stabilization project includes:

- 1) Installing steel sheet piles along 160 feet of the north bank of the storm drain. The sheet piles will be driven to an average of 19 feet below the existing grade.
- 2) New structural fill will be placed behind the sheet piles and a new 4-inch thick reinforced concrete slab will cap the area behind the sheet piles.
- 3) A chain-link fence will be installed along the entire length of the bank stabilization project.

A portion of the storm drainage way is located within the 40-foot shoreline setback, and the improvements that are within this area will require the approval of a shoreline setback variance, pursuant to Shoreline Setback Regulations, Chapter 23, Revised Ordinances of Honolulu (ROH), prior to necessary building and grading permits. The area is also located within the Special Management Area (SMA) and therefore, will require an SMA approval. According to the EA, the project will cost \$40,000, and will require a minor SMA Use Permit.

JULY 23, 2005

Chino (44-633 Kane'ohē Bay Drive) Shoreline Setback Variance (HRS 343 DEA)

District: Kane'ohē

Public Comment

Deadline: August 22, 2005
Status: Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the applicant with copies to the approving agency, consultant and OEQC.

Permits Required: Shoreline Setback Variance

The applicant is requesting an after-the-fact shoreline setback variance to permit the following within the 40-foot shoreline setback area of a 12,030-square-foot lot fronting Kane'ohē Bay: (1) the existing Concrete Rubble Masonry (CRM) retaining wall (approximately 6-feet high and 150 feet in length); and (2) the replacement of a collapsed 40-foot section of the existing CRM retaining wall. The existing retaining wall is approximately 3 feet wide at the base and tapers to 16 inches wide at the top. The base of the CRM wall is buried approximately 2 feet below existing grade. The CRM retaining wall was constructed in July 2003 to prevent soil loss in the direction of the ocean. In February 2004, a 40-foot section of the CRM wall failed.

A shoreline setback variance and building permit will be required. A shoreline survey was completed on April 10, 2004, and submitted to the Department of Land and Natural Resources on May 7, 2004. A current certified shoreline survey will be required prior to processing the shoreline setback variance application.

JULY 23, 2005

Pupukea Ridge Preservation (HRS 343 DEA)

(This is a re-submission of the Applicant's September 9, 2002 Draft EA)

 Contact: Anthony Ching (587-3822)

Consultant: Wilson Okamoto Corporation
 1907 S Beretania St., Ste. 400, Honolulu, HI 96826
 Contact: Rodney Funakoshi (946-2277)

Public Comment
Deadline: August 22, 2005
Status: Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the applicant with copies to the approving agency, consultant and OEQC.

Permits Required: State Land Use Boundary Amendment, CDUA, County Zoning Amendment & Subdivision Approval

A Charitable Foundation ("ACF") is the owner of three parcels on Pupukea Ridge totaling approximately 94.175 acres. ACF proposes to consolidate and re-subdivide the lots in order to donate approximately 79.03 acres to the State of Hawai'i for a State Park Preserve, with the balance to be retained. The project site is situated along a ridge in Pupukea, approximately 6.25 miles east of Hale'iwa town center on O'ahu's North Shore. The project site is further identified as Tax Map Keys ("TMK") 5-9-023:1, 5-9-024:1, and 6-1-002:22.

A State Land Use District Boundary Amendment petition will be filed with the State Land Use Commission to reclassify approximately 28.759 acres of the 38.684 acres (TMK 5-9-023:1 and 5-9-024:1) from the Agricultural District to the Conservation District, and reclassify approximately 5.22 acres of the 55.491 acres (TMK 6-1-002:22) from the Conservation District to the Agricultural District. This will have the effect of placing all of the lands to be donated for State Parks use within the Conservation District, and all of the lands to be retained within the Agricultural District. The Agricultural lands to be retained could subsequently be developed with up to four (4) farm dwellings with agricultural uses.

Contact: Rodney Funakoshi (946-2277)

Status: Final environmental assessment (FEA) and Finding of No Significant Impact (FONSI).

Permits Required: Dept. of Army, NPDES, Section 401 WQC, SMA, Shoreline Setback Variance, Building, Grading

In furthering the goal of creating a vibrant, mixed-use community, the Hawai'i Community Development Authority proposes to amend the Makai Area Plan and Rules to allow residential use in the Kaka'ako Makai Area. A Mixed-Use zone ("MUZ") designation will be established where residential, commercial and public uses will be allowed. Approximately 62.15 acres presently designated as commercial use will be re-designated as MUZ. The Makai Area Rules will also be amended to allow residential use in the Waterfront Commercial zone and the height limit for the Waterfront Commercial zone will be increased from 45 feet to 65 feet along the 'Ewa edge of Kewalo Basin. It is envisioned that the provision of residential use will promote the development of an "urban village" in the Makai Area where residents can live, work, shop, and socialize in the same area.

JULY 23, 2005

Kaupakuea Homesteads Easement (HRS 343 DEA)

District: South Hilo
TMK: (3) 2-8-02:17 (por.)
Applicant: Ms. Sheryl Fletcher
 RR2, Box 4061, Pahoa, HI 96771
 Contact: Sheryl Fletcher (965-7782)

Approving Agency: DLNR-Land Division
 PO Box 936, Hilo, HI 96721-0936
 Contact: Gordon Heit (974-6203)

Public Comment
Deadline: August 22, 2005
Status: Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the applicant with copies to the approving agency, consultant and OEQC.

Permits Required: Approval of Driveway location, Grading & Driveway Permit

The proposed project in South Hilo near Pepe'keo is for an easement over State Land to create access for 5 parcels. The

county paved this section of the Kaupakuea Homestead Rd. extension a few years back, but did not provide access to the original homestead road fronting the 5 parcels.

The proposed new section of driveway will be approximately 50 to 100 feet in length, twelve feet in width. The new work makes it necessary to cut into the existing driveway but will not impact the drainage ditch. The initial phase will include grading and clearing away of obstructive vegetation, while still preserving the existing landscaping. When the driveway is completed, gravel will be placed on the roadway and only steep inclines will be paved to eliminate erosion.

The project will enable the owners of these 5 parcels access to their property. The short term impacts will be 1) movement of soil to level parts of the roadway 2) temporary noise from earth-moving equipment 3) possible toxic materials used in construction (i.e. asphalt or concrete) 4) minor displacement of native animals in the area. Long-term impact expected to be minimal with the increased vehicles traveling the roadway from the 5 parcels.

Status: Final environmental assessment (FEA) and Finding of No Significant Impact (FONSI).
Permits Required: Plan Approval, Building Permits, NPDES

ing A will consist of a single-story structure located east of the existing Acute Care Hospital. It will house the adult daycare facility, lobby, reception and admissions, administrative offices, conference rooms, staff lounge, and various spaces for maintenance, storage, receiving deliveries, and mechanical, electrical and communication equipment. Building B will consist of a two-story structure with four wings lying to the east of Building A. The first floor of Building B will house 18 double- and 11 single-occupancy rooms served by a central nursing station, physical and occupational therapy facilities, a dining room and a family dining room, kitchen, barber, offices, resident and staff lounges, and areas for maintenance, laundry, storage and utilities. The second floor will provide 18 double- and 12 single-occupancy rooms with a central nursing station, multipurpose activity area, dietary facility, dining room and family dining room, offices, resident and staff lounges, and areas for maintenance, laundry, storage and utilities. A mechanical room and penthouse will sit atop the second floor at the center of the building.

The proposed project will redevelop the old Hilo Hospital site for the new Hawai'i State Veterans Home, which will provide a 95-bed long-term care facility and an adult daycare facility. Demolition of the abandoned Hilo Hospital buildings is ongoing and will also include the demolition of a portion of the connecting Laundry building to the north. The existing Generator Building and underground fuel tanks within the project site will remain.

The proposed project will include two buildings, at-grade parking, vehicular and pedestrian access and landscaping. Build-

The construction is anticipated to begin in July 2005, and will continue for approximately 16 to 18 months, with a preliminary completion date in late 2006. The estimated project cost is approximately \$32 million.

Final environmental assessment (FEA) and
Finding of No Significant Impact (FONSI).

Conditional Use Permit, Class IV Zoning Permit, SMA Permit, Wastewater Disposal Permit, NPDES, Building

The County of Kaua‘i is proposing the development of the Kaua‘i Adolescent Treatment Facility (KATF), a youth substance abuse treatment facility on approximately 1.182-acres of land situated at Pu‘olo Point at Hanapepe, Kaua‘i. KATF is a residential setting substance abuse treatment center providing alternative treatment services to Kaua‘i’s youth who have been unable to remain drug free with less restrictive services. The proposed site is identified as the former Kaua‘i Humane Society (KHS) property, which KHS vacated in early 1995, after relocating to their new facility at Kipu. The County of Kauai will be partnering with a private, 501(c)(3) registered, social services agency that is certified in providing the necessary treatment services to operate KATF.

KATF is a 16-bed residential substance abuse treatment facility—eight beds for girls and eight beds for boys. A residential treatment facility on Kauai would allow youth to remain on their home island while receiving treatment and would not have to leave their family during the treatment process to another island.

Project elements include the renovation of two (2) existing buildings including attendant infrastructure, and landscaping restoration. The scope includes the relocation of three (3) “portable” buildings from Lihue, and includes the installation of approximately 3,600 feet of 12-inch water line, and approximately 400 feet of 8-inch waterline.

Status: Final environmental assessment (FEA) and Finding of No Significant Impact (FONSI).
Permits Required: Kaua'i Open Zone Use, Class IV Zoning, other construction related permits.

The State of Hawai'i Department of Land and Natural Resources (DLNR) proposes to develop a permanent well on the

site of the existing exploratory well in Kapa'a on the island of Kaua'i.

The existing exploratory well has been drilled, cased and pump tested at the site to determine the quantity and quality of water produced from the well. Since the test results are acceptable, the well will be outfitted and converted into a production well. This will involve leaving the test pump in or installing a permanent pump, outfitting the pump with appurtenances (pipe, valves, controls, etc.) and construction of the pump house.

The proposed project site is located just inland of Kapa'a Town, mauka of Kuhio Highway and adjacent to the Moikeha Canal. The Department of Land and Natural Resources controls and manages the 1.346-acre parcel, which is identified by Tax MapKey 4-5-15, portion of 6.

The site is designated as an Urban District and is within the Open Zone. It is not located within the Special Management Area.

In general there are no environmentally unique characteristics associated with the project site. The proposed project is primarily surrounded by pastureland, so work will not disrupt residential area.

JULY 23, 2005

Village at Po'ipu (HRS 343 FEA-EISPN)

District: Koloa
TMK: (4) 2-8-13:01, 2-8-14:01-04, 2-8-14:19, 2-8-14:37 & Lot 19-B (Hapa Rd.)
Applicant: Eric A. Knudsen Trust
 P.O. Box 759, Kalaheo, HI 96741
 Contact: Stacey Wong, Trustee (332-5676)
Accepting Authority: State Land Use Commission
 P.O. Box 2359, Honolulu, HI 96804
 Contact: Anthony Ching (587-3822)
Consultant: PBR Hawaii, ASB Twr, 1001 Bishop St.,
 Ste. 650, Honolulu, HI 96813
 Contact: Kimi Yuen (521-5631)
Status: Final environmental assessment (FEA) and Environmental Impact Statement Preparation Notice (EISPN), pending 30-day public comment and requests to become a consulted party in the preparation of the upcoming draft environmental impact statement (DEIS). Address public comments on the FEA and/or requests to become a consulted party in the preparation of the upcoming DEIS to the applicant with copies to the approving agency, consultant and OEQC.
Public Comment Deadline: August 22, 2005
Permits Required: State Land Use Boundary Amendment, National Pollutant Elimination Discharge Permit, Grading/Building Permits, Sub-division

The Eric A. Knudsen Trust proposes to develop a residential community called the Village at Po'ipu, to be located in Po'ipu, Kaua'i. The project will include a mix of single-family and

multi-family residential units, archaeological preserves, parks, and bicycle/pedestrian paths.

Located in an area designated as "Residential Community" on the Kaua'i County General Plan, the project is expected to fill some of South Kaua'i's residential growth needs by providing a variety of housing options. Also, given the tight housing market, the project will help increase the supply of housing available in one of Kaua'i's largest resort areas and job centers.

As planned, the project will contain 350-503 residential units, 12 acres of parks, and 22 acres for archaeological preserves. Bicycle and pedestrian paths will be built including a shared path in Hapa Road.

Positive impacts include providing much needed housing to the region, preservation of archaeological sites, park and open space within the community, health benefits, and positive economic impacts. Other impacts include changes to the land use and character of the property from pastureland to residential, potential increases in traffic, greater demands on public infrastructure systems and services, and short-term impacts to air quality and noise levels due to construction.

This EISPN is being undertaken to address H.R.S. Chapter 343 requirements and support State Land Use District Boundary Amendment (SLUDBA). The Draft EIS will contain analyses of potential impacts and associated mitigation measures to ensure potential adverse impacts are minimized or mitigated.

Shoreline Notices

JULY 23, 2005

Shoreline Certifications and Rejections

Pursuant to §§13-222-26, HAR the following shorelines have been proposed for certification or rejection by the DLNR. Any person or agency wishing to appeal a proposed shoreline certification or rejection shall file a notice of appeal in writing with the department no later than 20 calendar days from the date of the public notice of the proposed shoreline certification or rejection. The Notice of appeal shall be sent to the Board of Land and Natural Resources, 1151 Punchbowl Street, Room 220, Honolulu, Hawai'i 96813.

File No.	Status	Location	Applicant/Owner	TMK

Federal Consistency Reviews

The Hawai'i Coastal Zone Management (CZM) Program has received the following federal actions to review for consistency with the CZM objectives and policies in Chapter 205A, Hawai'i Revised Statutes. This public notice is being provided in accordance with section 306(d) (14) of the National Coastal Zone Management Act of 1972, as amended. For general information about CZM federal consistency please call John Nakagawa with the Hawai'i CZM Program at 587-2878. For neighboring islands use the following toll free numbers: Lana'i & Moloka'i: 468-4644 x72878, Kaua'i: 274-3141 x72878, Maui: 984-2400 x72878 or Hawai'i: 974-4000 x72878. For specific information or questions about an action listed below please contact the CZM staff person identified for each action. Federally mandated deadlines require that comments be received by the date specified for each CZM consistency review and can be mailed to: Office of Planning, Department of Business, Economic Development and Tourism, P.O. Box 2359, Honolulu, Hawai'i 96804 or, fax comments to the Hawai'i CZM Program at 587-2899.

1) Proposed Improved Guidelines for Fishery Management Decisions to Prevent Overfishing & Rebuild Stocks.

Applicant: National Marine Fisheries Service
Federal Action: Federal Agency Activity
Location: Federal waters from 3 to 200 miles offshore
CZM Contact: John Nakagawa, 587-2878
Proposed Action: The National Marine Fisheries Service is proposing improved guidelines to help fishery managers implement National Standard One of the Magnuson-Stevens Fishery Conservation and Management Act. National Standard One requires fishery managers to prevent overfishing and rebuild stocks in federal waters, from 3 to 200 miles offshore, while achieving the optimum yield from each fishery. The proposed revisions to the National Standard 1 guidelines and the Environmental Assessment

and Regulatory Impact Review for this proposed rule are available at the following website: www.nmfs.noaa.gov/sfa/domes_fish/index.htm.

Comments Due: August 5, 2005

2) Proposed Facility Improvements at the Honolulu International Airport

Applicant: US Federal Aviation Administration
Contact: Keith Lusk, (310) 725-6925
Federal Action: Federal Agency Activity
Location: Honolulu International Airport, Oahu
CZM Contact: Debra Tom, 587-2840
Proposed Action: The Federal Aviation Administration is proposing various facility improvements to the Honolulu Control Facility at the Honolulu International Airport. The improvements include the existing guardhouse, lighting systems, chain link fencing and parking.

Comments Due: August 5, 2005

Special Management Area Documents (Chapter 25, Revised Ordinances of Honolulu)

Since SMA-only (Chapter 25, ROH) documents do not trigger the EIS law as articulated in Chapter 343, Hawaii Revised Statutes, effective September 1, 2001 OEQC will no longer review these documents for completeness or adequacy. However, OEQC will continue to provide notice of these projects as a public service. Questions regarding the adequacy, completeness and availability of these documents should be addressed directly to the county contact listed below.

Wai'au Power Plant Repairs and Modifications

Applicant: Hawaiian Electric Company, Inc.
Contact: Shawn E.K. Tasaka (543-7520)
Location: Central O'ahu
TMK: 9-8-3:1; 9-7-18:12; and 9-8-4:3
Approving Agency: Dept. of Planning & Permitting
650 S. King Street, 7th Floor
Honolulu, HI 96813
Contact: Adrian Siu-Li (527-5072)

deteriorating wood piles that form the eastern bank of the pond. The sheet piles will be installed close to the existing timber piles on the water side.

2) Install intake air filtration components and upgrade the generating compartment ventilation systems serving Wai'au Units 9 and 10. A combustion turbine inlet air filtering system and filter house will be added to the mauka side of the units. In addition, the existing generator compartment ventilation inertial filter system will be replaced with a new high-efficiency filter system.

3) Construct a new utility bridge between Generating Unit 8 and nearby wastewater treatment tank. The utility bridge will consist of structural components of the bridge that will support utility lines and provide access to maintenance workers, and utility cables and pipes serving Wai'au Units 7 and 8.

The applicant, Hawaiian Electric Company, Inc. (HECO) proposes the following repairs and modifications to it's Wai'au Power Plant.

1) Replace the timber pile wall currently stabilizing the bank of Wai'au Pond. This involves placing new steel sheet piles along 630 feet of the banks of the Wai'au Pond to reinforce the

National Environmental Policy Act

Military Training Activities at Makua Military Reservation, Hawaii

The US Army proposes to conduct live-fire and nonlive-fire military training exercises at Mākua Military Reservation (MMR) for the combat units assigned to the 25th Infantry Division (Light) and for other military units. These training exercises would include company-level combined-arms live-fire exercises (CALFEXs).

Four alternatives have been evaluated: the No Action Alternative and three alternatives to achieve the proposed action. All project alternatives would involve training for up to 242 days each year, and training would be conducted primarily within the 1,136-acre training area.

Alternative 1 (Reduced Capacity Use with Some Weapons Restrictions) involves use of MMR for maneuver training, air assaults, sniper training, convoy training, demolitions training, and as a staging base for ground or air movement. The Army would conduct 19 to 28 company-level CALFEXs per year.

Alternative 2 (Full Capacity Use with Some Weapons Restrictions) involves use of MMR similar to that under Alternative 1. However, the Army would conduct up to 50 company-level CALFEXs per year using tracer ammunition.

Alternative 3 (Full Capacity Use with Fewer Weapons Restrictions) involves use of MMR similar to that under Alternative

2. In addition, the Army would use inert, tube-launched, optically tracked, wire-guided (TOW) missiles, 2.75-caliber rockets, and illumination munitions, plus additional land area. Alternative 3 is the Army's preferred alternative.

Significant and unmitigable adverse impacts may occur on land use and recreation, noise, geology and soils, biological resources, cultural resources, socioeconomic and environmental justice, and wildfires. Significant and mitigable adverse impacts may occur on traffic and transportation, water resources, biological resources, cultural resources, socioeconomic and environmental justice, and wildfires.

Copies of the DEIS are available for review and can be obtained upon request by contacting:

Public Comment Deadline: September 20, 2005
U.S. Army Corps of Engineers
Honolulu Engineer District, Building 230
Fort Shafter, HI 96858-5440
Contact: Gary Shirakata (438-0772)

At the conclusion of the review, the Army will respond to any comments, finalize the EIS and develop the Record of Decision

Pollution Control Permit Applications

JULY 23, 2005

Department of Health Permits

The following three pages contain a list of some pollution control permits currently before the State Department of Health. For more information about any of the listed permits, please contact the appropriate branch or office of the Environmental Management Division at 919 Ala Moana Boulevard, Honolulu. Abbreviations are as follows: **CAB** - Clean Air Branch; **CD** - comments due; **CSP** - Covered Source Permit; **CWB** - Clean Water Branch; **I** - issued; **SHWB** - Solid and Hazardous Waste Branch; **SDWB** - Safe Drinking Water Branch; **N** - none; **NPDES** - National Pollutant Discharge Elimination System under the Federal Clean Water Act; **R** - received; **T** - temporary; **UIC** - Underground Injection Control; **NA** - not applicable.

Initiation of Five-Year Reviews for Various Species

The U.S. Fish and Wildlife Service (FWS) has given notice of the initiation of 5-year reviews for the following species: Mariana Fruit Bat (*Pteropus mariannus mariannus*); crow (*Corvus hawaiiensis*); Laysan Duck (*Anas laysanensis*); Kaua'i 'Akialoa (Honeycreeper) (*Hemignathus procerus*); Large Kaua'i Thrush (*Myadestes myadestinus*); Kaua'i 'O'o (Honeyeater) (*Moho braccatus*); Ou (Honeycreeper) (*Psittirostra psittace*); Moloka'i Creeper (*Paroreomyza flammea*); Moloka'i Thrush (*Myadestes lanaiensis rutha*); Kaua'i Cave Wolf Spider (*Adelocosa anops*); Kaua'i Cave Amphipod (*Spelaeorchestia koloana*); *Alsinidendron obovatum* (no common name); *Amaranthus brownii* (no common name); *Chamaesyce celastroides* var. *kaenana* ('Akoko); *Chamaesyce deppeana* ('Akoko); *Chamaesyce herbstii* ('Akoko); *Chamaesyce skottsbergii* var. *kalaeloana* ('Ewa Plains 'Akoko); *Clermontia pyrularia* ('Oha Wai); *Cyanea grimesiana* ssp. *obatae* (no common name); *Cyanea pinnatifida* (Haha); *Cyanea st.-johnii* (Haha); *Cyanea superba* (Haha); *Cyanea truncata* (Haha); *Cyrtandra dentate* (Ha'iwale); *Gouania vitifolia* (no common name); *Hedyotis degeneri* (no common name); *Hibiscadelphus woodii* (hau kuahiwi); *Castilleja levisecta* (Golden paintbrush); Fender's Blue Butterfly (*Icaricia icarioides fenderi*); *Erigeron decumbens* var. *decumbens* (Willamette Daisy); *Lupinus sulphureus* ssp. *kincaidii* (Kincaid's Lupine); *Lomatium bradshawii* (Bradshaw's Desert Parsley); and *Sidalcea nelsoniana* (Nelson's Checker-mallow). The purpose of a 5-year review is to ensure that the classification of a species as threatened or endangered on the List of Endangered and Threatened Wildlife and Plants is accurate and consistent with the best scientific and commercial data available at the time of the review. We are requesting submission of any such information that has become available since the original listing of each of these 33 species. Based on the results of these 5-year reviews, we will consider whether the status of the species should be changed, pursuant to section 4(c)(2)(B) of the Act. (see, 70 F.R. 38972, July 6, 2005).

utilities that own, control, or operate facilities for transmitting electric energy in interstate commerce to amend their open access transmission tariffs to include standard generator interconnection procedures and an agreement that the Commission is adopting in this order and to provide interconnection service to devices used for the production of electricity having a capacity of no more than 20 megawatts. A non-public utility that seeks voluntary compliance with the reciprocity condition of an open access transmission tariff may satisfy this condition by adopting these procedures and agreement. This Final Rule will become effective August 12, 2005. For more information contact Kumar Agarwal (Technical Information), Office of Market, Tariffs and Rates, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. (202) 502-8923 (see, 70 F.R. 34189, June 13, 2005).

Fiscal Year 2006 Grant Funds Available from NOAA

The National Oceanic and Atmospheric Administration (NOAA) announce the availability of grant funds for Fiscal Year 2006. The purpose of this notice is to provide the general public with a single source of program and application information related to the Agency's competitive grant offerings and it contains the information about those programs required to be published in the Federal Register. This omnibus notice is designed to replace the multiple Federal Register notices that traditionally advertised the availability of NOAA's discretionary funds for its various programs. It should be noted that additional program initiatives unanticipated at the time of the publication of this notice may be announced through both subsequent Federal Register notices and the NOAA Web site. These announcements will also be available through the Federal Grants website. For more details, please see the NOAA Web site at <http://www.ofa.noaa.gov/%7Egrants/funding.shtml>. The uniform resource locator (URL) for Federal Grants is <http://www.grants.gov> (see, 70 F.R. 37766, June 30, 2005).

Standardization of Small Generator Interconnection Agreements and Procedures; Final Rule

The Federal Energy Regulatory Commission (Commission) is amending its regulations under the Federal Power Act to require public

Conservation District Notices

JULY 23, 2005

Conservations District Use Permit

Persons interested in commenting on the following Conservation District Use Application (Department Permit) must submit comments to the Department of Land and Natural Resources. Also, anyone interested in receiving notification of determination on Conservation District Use Applications (Department Permits) must submit requests to DLNR that include the following information:

1. Name and address of the requestor.
2. The permit for which the requestor would like to receive notice, notice of determination; and
3. The date the notice was initially published in the Environmental Notice.

Both comments and requests for notification of determinations must be submitted to DLNR within thirty days from the initial date that the notice was published in the Environmental Notice. Please send comments and requests to:

State of Hawai'i
Department of Land and Natural Resources
Office of Conservation and Coastal Lands
1151 Punchbowl Street, Room 131
Honolulu, Hawai'i 96813

DLNR will make every effort to notify those interested in the subject CDUA, it is not obligated to notify any person not strictly complying with the above requirements. For more information please contact Dawn Hegger of our Office of Conservation and Coastal Lands staff at 587-0380.

Kiki'ola Small Boat Harbor Project

File No.: CDUA KA-3240
Applicant: Kiki'ola Small Boat Harbor Project
Location: Waime'a, Kaua'i
TMK: (4) 1-2-006:003 and 017
Proposed Action: Dredging the entrance channel, access channel and berthing area, modifications/repairs to the breakwaters, sand bypassing, beach nourishment and improvements to the boat ramp and dock facilities.

343, HRS determination: FONSI/Final Environmental Assessment (FEA) was published in OEQC's Environmental Notice on July 23, 1998.

Applicant's Contact: Department of Land and Natural Resources, Division of Boating and Ocean Recreation, Carty Chang (587-0122)

Environmental Announcements

Correction Note: Kahe'awa Pastures Wind Energy Generation Facility Draft Habitat Conservation Plan and Indicental Take License

In the July 8th Environmental Notice an error was made on the comment deadline for this project, it should have stated September 6, 2005 as the comment deadline.

Withdrawl of Kuhio Highway, Manoa Stream Ford Crossing

On June 6, 2005 The Department of Transportation, Highways Division Design Branch withdrew this project. It was originally published in the April 23, 2000 Envirnomental Notice.

Environmental Council Notices

Environmental Council Organization

On July 13, 2005, the Environmental Council in quorum assembled elected Denise Antolini as its Chairperson pursuant to Section 341-3(c), Hawai'i Revised Statutes. The Environmental Council also elected Faith Caplan as its Vice Chairperson, to serve as Chairperson in the absence of the same pursuant to Section 11-201-4, Hawai'i Administrative Rules.

August 10, 2005, Meetings at Various Times in Leiopapa A Kamehameha

The Environmental Council of the Department of Health and its various standing and ad hoc committees are scheduled to meet on Wednesday, August 10, 2005, at various times and in various rooms in Leiopapa A Kamehameha, located at 235 South Beretania Street, Honolulu, O'ahu. For more information, please call the Office of Environmental Quality Control at (808) 586-4185. To be placed on an electronic mail notification list of Environmental Council meetings, please send an electronic mail to Leslie Segundo, Environmental Health Specialist, Office of Environmental Quality Control at LSEGUND@mail.health.state.hi.us. The meeting notices and agenda of the Environmental Council are also available on the State's Calendar Meeting Announcements Internet Website at the following Uniform Resource Locator (URL):

http://www.ehawaii.gov/org/serv/eventcal?PF=hic&Clst=81&_action=View+Calendar.
